

## Circuit #13: Relays

### Code:

```
int ledPin = 2;

void setup() {
  pinMode(ledPin, OUTPUT);
}

void loop() {
  //set the transistor on
  digitalWrite(ledPin, HIGH);
  // wait for a second
  delay(1000);
  // set the transistor off
  digitalWrite(ledPin, LOW);
  // wait for a second
  delay(1000);
}
```
